(a) The category "Not at work" includes those who stated that they were usually engaged in work, but were not actively seeking a job at the time of the Census by reason of sickness, accident, etc., or because they were on strike, changing jobs or temporarily laid off, etc. It includes also persons able and willing to work but unable to secure employment, as well as casual and seasonal workers not actually in a job at the time of the Census. The numbers shown as "Not at work", therefore, do not represent the number of unemployed available for work and unable to obtain it.

Employed Persons

The questions used in the Householder's Schedule for this Population Count to determine the number of persons in the work force were framed to conform as far as practicable with the recommendations of the Eighth International Conference of Labour Statisticians held in Geneva in 1954. They thus differ in form and in resultant data from the questions used and in data derived in the 1961 Australian Census of Population as shown in Tables 15 and 16. For the Population Count the basic question was—

“Did the person do any work at all (other than unpaid housework) during last week (that is, from Monday, 24th June, to Sunday, 30th June, 1963) for payment, profit or keep or as an unpaid helper in a family business or farm. Answer either yes or no.”

For persons for whom the answer was “yes” a further question asked—

“State the usual number of hours worked per week”.

Thus the statistics pertaining to the work force presented in Tables 17 and 18 embrace all persons who did any work at all (other than unpaid housework) during the week 24th to 30th June, 1963, for payment, profit or keep or as an unpaid helper in a family business or farm whether full-time, part-time, for less than usual hours, casually, etc.

Unemployed Persons

Unemployed persons are all those who, during the week 24th to 30th June, 1963, did no work at all and—

- (a) did not have a job or business but looked for work; or
- (b) were temporarily laid off without pay for the whole week.

(a) In respect of which a separate Householder's Schedule was furnished. (b) Prior to 1961 single self-contained dwellings attached to or situated above offices, shops, etc., were classified as private houses irrespective of the description stated in the Householder's Schedule. In 1961 such dwellings, if described as self-contained flats, were classified as flats. (c) Includes " caretakers' quarters " which in 1961 were classified as private dwellings.

NOTE

Occupied dwelling.—An occupied dwelling is any habitation occupied by a household group living together as a domestic unit, whether comprising the whole or only part of a building. The term has therefore a very wide reference and includes, in addition to houses and flats, a great variety of " dwellings " ranging from a single-roomed shack to a multi-roomed hotel or institution. Occupied dwellings are classified into " private " and " other than private " dwellings.

Private dwelling.—Private dwellings are further classified into the following four categories:—

Private house.—Private houses include houses, sheds, huts, garages, etc., used for dwelling purposes, and shared private houses for which only one Householder's Schedule was received.

Share of private house.—A share of a private house is a portion of a shared private house which is occupied separately and for which portion a separate Householder's Schedule was received.

Flat.—A flat is part of a house or other building which can be completely closed off and which has its own cooking and bathing facilities.

Other private dwelling.—These include private dwellings such as rooms, apartments, etc., which are parts of buildings but are not self-contained units.

Other than private dwelling.—These include hotels; motels; boarding houses, lodging houses and hostels; educational, religious and charitable institutions; hospitals; defence and penal establishments; police and fire stations; clubs; staff barracks and quarters, etc.

(b) This information was furnished by occupants of dwellings at 30th June, 1961. For a number of reasons the figures shown on this line do not agree with the number of dwellings by class recorded at the Census of 30th June, 1954, e.g., demolitions, conversions from one class of dwelling to another and errors of memory regarding date of building. Also the figures are not precisely comparable with 1954 data because of changes in classification of dwellings adopted at the 1961 Census, as indicated in Table 22.

(c) After 30th June, 1954, but year not stated.
